Study in Charlottesville Looking For People w/ HIV

August 26, 2012 By Shawn Decker

I received something in the mail a few weeks ago about a study for people living with HIV and felt like I should pass the information along for anyone who is interested in participating and helping out with the study.

Positively Yours,
Shawn

Are you living with HIV? Do you sometimes forget you medicines? Do you sometimes use alcohol or drugs? IF yes, you may be interested in a research study at UVa. The study involves answering health questions and possibly getting cell phone messages. Study time commitment is from 5 to 14 hours total over 6 months. Temporary cell phone/$10 gift or gas card (if in the group to receive texts) and up to $150 for completing the study are provided. For more information call toll-free to 1-866-485-5226 or call 434-243-0642 or email us at sh4ha@hscmail.mcc.virginia.edu
