

# Condom Wrap-up

The top six raincoats for getting wet. We asked 700 experts (POZ Personals members).

August 1, 2005

---

## **Trojan Magnum 50%**

“Guys with larger penises don’t complain about them as much because they fit better and feel better; therefore they’re more apt to use them.”

## **Durex Avanti 10%**

“Polyurethane condoms transmit heat better, which makes sex more sensitive—almost as if you aren’t wearing one—but their higher price dissuades us from using them.”

## **Trojan-enz 7.2%**

“It has the right size and amount of lube. It doesn’t make me feel like I’m being squeezed into sausage casing.”

## **LifeStyles Tuxedo 4.3%**

“Something about the black latex makes me feel more aroused, turned on and passionate about getting down. It makes me think of leather—it’s kinky.”

## **Reality Female Condom 3.8%**

“It’s stronger, safer and can use any type of lube, and it feels better for the insertive partner. It’s great for guys who refuse to use condoms because they’re too tight.”

## **LifeStyles Ultra Sensitive 3.3%**

“It’s very thin yet feels strong enough for anal sex. You can still feel the pleasure and sensations. I don’t like condoms. But this is the one I prefer when I decide to wear one with neggies. I don’t usually wear one during oral sex or if my partner is positive, too.”
