

AIDS Traced to 3 Chimp Hunters in Africa

January 9, 2012 By Cristina Gonzalez

According to the new book *The Origins of AIDS*, HIV in humans can be traced back to about 80 chimpanzees in Africa that infected about three bush-meat hunters around 1921. The virus was further spread through the use of non-sterile medical equipment. Mystery solved! Or is it? [Click here](#) to read an interview with author Jacques Pépin, MD, an infectious disease specialist, to find out.
