Risky Business

A porn primer on unsafe sex

August 1, 2004 By Staff

The mostly condom-free straight-porn industry has avoided regulation—and medical catastrophe—with a system of strict self HIV testing. But in April, five stars tested positive, prompting the panicked biz's brief shutdown and a slew of leering headlines. *POZ* probed these performers' scenes to assess the degree of HIV danger associated with each sex act.

+ = Low risk
++++ = High risk

STAR: Bianca Biaggi
FILM: Yesterday I Was Seventeen (Red Light District)
STUNTS: In a birthday threesome, Bianca gets her booty licked, gives a blow job (and swallows); she follows with receptive vaginal sex and a hefty facial cum shot.
RISK REVIEW: A tongue in the backdoor and spermy face cream aren't dangerous, but unprotected vaginal sex certainly is, and swallowing jizz is iffy—even when given as a birthday present.
***POZ* RATING:** Swallowing cum ++, Receptive vaginal sex ++++

STAR: Darren James
FILM: Choc Full of Nut (Red Light District)
STUNTS: In this threesome, Darren (wearing tube socks) performs cunnilingus and analingus, gets blown and penetrates (solo and with the other dude) the woman's anal and vaginal orifices.
RISK REVIEW: Darren—whom the industry fingered as the viral vector—does it all. From least to most risky: getting his dick licked, licking a clit, licking a butt, dicking a clit and dicking a derrière.
***POZ* RATING:** Licking butt or bush +, Insertive vaginal or anal sex ++

STAR: Lara Roxx
FILM: Split That Booty 2 (Evasive Angles)
STUNTS: The film hasn't been released due to its now-historical HIV-swapping showstopper: a rough and rowdy threesome with heaps of double anal penetration (two dicks, one hole).
RISK REVIEW: Two is not always better than one. Receptive anal sex is the riskiest act because it likely tears the skin, exposing fissures and blood—a lousy combo with infected semen.
***POZ* RATING:** Receiving double anal penetration ++++ x2

STAR: Jessica Dee
FILM: Cumback Pussy #45 (Elegant Angel)
STUNTS: A sheet-twisting threesome during which Jess accepts anal, oral and vaginal deliveries; there's also double vaginal penetration, fingering and facial cum shots.
RISK REVIEW: If only Jess had let fingers do the walking—there's virtually zero risk of transmission from touch. But leaving the orifices undefended ain't the smartest career move.
***POZ* RATING:** Receiving double vaginal penetration +++ x2, Masturbating: RISK-FREE

STAR: Miss Arroyo
FILM: Lady Fellatio in the Dog House (Elegant Angel)
STUNTS: A trench-coated tryst with a truck-stop stranger; the missus gives a BJ, but the mister fails to ejaculate.
RISK REVIEW: Of all of the above, Miss A is at lowest risk. It's *possible* to contract HIV by giving BJs even when the juice is not loose (HIV travels in pre-cum), but it's also possible to be struck by lightning.
***POZ* RATING:** Sucking dick without the surprise sticky ending +
