2013 Update of AIDSVu Includes New Interactive Online Maps

July 1, 2013

AIDSVu has launched its annual update, according to an AIDSVu statement. It includes new interactive online maps showing the latest HIV prevalence data for 20 U.S. cities by ZIP code or census tract. Various social determinants of health, such as poverty, lack of insurance and educational attainment also are included. The new data was compiled by the Rollins School of Public Health at Emory University in Atlanta.
