Educated Risk

The results are in.

April 3, 2017 By Jennifer Morton

The Merriam-Webster's Dictionary defines risk as the "possibility of loss or injury." Yet many of us choose to take risks every day because we believe the potential payoff outweighs the potential loss. This is known as an informed or educated risk. When it comes to HIV transmission, it's important to accurately understand the risk factors so you can make informed choices. POZ recently asked for your thoughts about risk when it comes to HIV transmission. Here are your responses.
