

# Everyday – July/August 2019

Here are some important dates in AIDS history.

July 1, 2019 By Jennifer Morton

---

AIDS is an everyday experience. These dates represent milestones in the AIDS epidemic. Some dates are known globally; others commemorate individual experiences. AIDS Is Everyday is an ongoing art project produced in conjunction with Visual AIDS to help break down the silence, shame and stigma surrounding HIV.

Add a date about your history with HIV to our online calendar [here](#).

JULY

- 1 - The U.S. Public Health Service opens the National AIDS Hotline to respond to public inquiries about the disease. By the end of the month, it receives 8,000 to 10,000 calls daily. (1983)
- 3 - The U.S. Food and Drug Administration (FDA) approves the first at-home HIV test. It provides results within 40 minutes. (2012)

4 - Terrence Higgins is one of the first people in the United Kingdom to die of AIDS-related causes. His friends create the Terrence Higgins Trust in his honor. Today, it's the leading HIV and AIDS charity in the U.K. (1982)

17 - Malaysia Airlines Flight 17 is shot down while flying over eastern Ukraine, killing everyone aboard, including six prominent scientists and AIDS activists on their way to the 20th International AIDS Conference in Melbourne. (2014)

18 - A group of minority leaders meets with U.S. Surgeon General C. Everett Koop, MD, to discuss concerns about HIV/AIDS in communities of color. The meeting marks the unofficial founding of the National Minority AIDS Council. (1986)

Istock

25 - San Francisco General Hospital opens Ward 5B, the first dedicated in-patient AIDS ward in the United States. Within days, all of its 12 beds are occupied. (1983)

AUGUST

Istock

1 - U.S. health officials declare the nation's blood supply is free of the virus that causes AIDS thanks to a new test that screens out contaminated blood. (1985)

5 - A federal judge orders Florida's DeSoto County School Board to enroll brothers Ricky, Robert and Randy Ray—all of whom are living with hemophilia and HIV—in school. After the ruling, outraged residents refuse to allow their children to attend school, and on August 28, someone sets fire to the Ray house, destroying it. (1987)

Istock

9 - Drug counselor David Purchase sets up the nation's first needle-exchange program on a sidewalk in Tacoma, Washington. Within five months, he exchanges 13,000 needles to prevent HIV. (1988)

18 - The FDA sanctions the first human testing of a candidate vaccine against HIV. (1987)

Michael Jeter Paul Smith/FeatureFlash/Dreamstime.com

30 - Actor Michael Jeter (Evening Shade, Sesame Street) dies of AIDS-related causes. (2003)

Istock

31 - The Pentagon declares that as of October 1, it will test all military recruits for HIV and reject those who test positive for the virus. (1985)
