Drug-Resistant Staph and HIV - Part 1

November 4, 2008

At the 2008 joint meeting of the Interscience Conference on Antimicrobial Agents and Chemotherapy (ICAAC) and the Infectious Disease Society of America (IDSA), Tim Horn speaks with Nancy Crum-Cianflone, MD, MPH, a researcher and physician at the Naval Medical Center in San Diego, about methicillin-resistant Staphylococcus aureus (MRSA), a potentially serious drug-resistant bacterial infection that is becoming increasingly more common among people living with HIV. In part one of this two-part interview, Dr. Crum-Cianflone discusses the dangers of MRSA and the higher risk of the infection in people living with HIV.
