

Struggling With Stigma

Find out how stigma affects people living with HIV and how some people are working to combat it.

January 8, 2018 By Jennifer Morton

HIV stigma is one of the biggest challenges to ending the epidemic. It can affect a person's ability to access HIV testing, counseling, education, care, support and treatment. You can help combat stigma by supporting those living with the virus and educating others about HIV.

How often do you face HIV-related stigma?

38% Frequently

29% Occasionally

33% Rarely

86% of POZ readers say HIV-related stigma has made dating/relationships more difficult.

71% say HIV-related stigma has prevented them from seeking care, treatment or support.

62% say HIV-related stigma has isolated them from their family or friends.

60% say HIV-related stigma has adversely affected their career.
