

5 Things About HIV They're Not Telling You- by Mark S. King

January 21, 2011 By [Shawn Decker](#)

Mark S. King of the wonderful site, [My Fabulous Disease](#), recently sat down with Sean Strub to discuss "[Five Things About HIV They're Not Telling You](#)". It's the antithesis of Death Anus, in that they discuss real science and hopeful information about HIV and how much we've learned since the death ads of the late 1980s. This is such a great conversation between two long-term survivors and thrivers with HIV. Watch and learn.

Plus you get to see them in a one point ping pong match to determine the greatest ping pong player of all-time with HIV. **SPOILER ALERT: Mark wins.**

Positively Yours,
Shawn
