

Another Kind of AIDS Crisis

November 2, 2009 By [Oriol R. Gutierrez Jr.](#)

New York magazine recently published a great article titled "[Another Kind of AIDS Crisis](#)" by David France, which discusses the medical issues confronting HIV-positive people as they grow older.

Diseases and symptoms associated with the elderly are being seen increasingly in long-term survivors of HIV/AIDS, such as dementia and bone weakness.

I highly recommend the article and the accompanying video:
