

Final USCHA 2023 Conversations: PrEP Uptake, AI & a Federal HIV Plenary [VIDEOS]

Plus, the U.S. Conference on HIV/AIDS (USCHA) workshop “Ending the HIV Epidemic: Black Women, HBCUs, & PrEP Uptake.”

September 12, 2023 By [HIV.gov](#)

During the final two days of the 2023 [US Conference on HIV/AIDS \(USCHA\)](#) in Washington, DC, HIV.gov continued its conversations with a focus on the theme, “A Love Letter to Black Women.” On Friday, CAPT Jyl Martin, MPH, CHES, NHDP-BC, U.S. Public Health Service and Senior Policy Analyst, Office of Infectious Disease and HIV/AIDS Policy (OIDP), [chatted with Dr. Marissa Robinson](#), DrPH, MPH, RPCV, EHE Coordinator, about her workshop Ending the HIV Epidemic: Black Women, HBCUs, & PrEP Uptake.

Later that day, HIV.gov hosted conversations with community members about how to use artificial intelligence (AI) in their HIV work. Afterwards, [we spoke with AI workshop participants](#) from Howard and American universities about the importance of understanding AI. [Watch Friday's update](#) below:

On Saturday, September 9, Kaye Hayes, MPA, Deputy Assistant Secretary for Infectious Disease; Director of the Office of Infectious Disease and HIV/AIDS Policy; and Executive Director, Presidential Advisory Council on HIV/AIDS (PACHA), opened the final plenary session, which was a powerful presentation by Black women leaders in the federal government. After the session, [Hayes facilitated a conversation](#) with Department of Health and Human Services leaders about federal agencies' work to support Black women [you can watch that conversation in the video at the top of this blog post]. [Watch Saturday's update](#) below:
