

HIV Prevention Highlights To Look Out For At IAS 2023

Expect to find the latest research on PrEP, medical male circumcision, long-acting injectable cabotegravir, mpox and much more.

May 25, 2023 By [International AIDS Society](#)

IAS 2023, the [12th IAS Conference on HIV Science](#), will feature the latest science on HIV prevention – from voluntary medical male circumcision to PrEP access among trans women and men who have sex with men.

[Register for IAS 2023 today](#) and join thousands of HIV professionals in Brisbane, Australia, and virtually from 23 to 26 July 2023.

Expect to find the latest research on PrEP, medical male circumcision, long-acting injectable cabotegravir, mpox and much more. HIV prevention scientific highlights include:

- Results from a randomized controlled trial examining the efficacy of voluntary medical male circumcision in preventing HIV among men who have sex with men
- New insights on PrEP access, preferences and uptake, including the largest-ever study to measure unmet need for PrEP among trans women and men who have sex with men in Asia
- An important study examining whether PrEP use during pregnancy is associated with lower bone mineral density in young children
- Results from a study examining the cost effectiveness of long-acting injectable cabotegravir (CAB-LA) as PrEP among adolescent girls and young women in South Africa
- New evidence from Zimbabwe that the dapivirine vaginal ring is an acceptable and feasible alternative to daily oral PrEP for HIV prevention
- The latest research on mpox, including mpox/HIV co-infection and mpox vaccine uptake

[Meet the featured speakers](#)

IAS 2023 will feature an exciting line-up of leading experts highlighting the latest in cutting-edge

HIV research and its applications.
