

Intro—Ciarra

I want to be a voice for others who are not able to use their own.

January 15, 2019 By [The Well Project](#)

This [post](#) was written by Ciarra and originally appeared on [A Girl Like Me](#), a blog for women and girls on [The Well Project](#).

I am 30-years-old from Philadelphia, Pennsylvania. I was diagnosed at the age of 20 with HIV; undetectable most of the 10 years. I contracted HIV in a heterosexual relationship during my junior year of college. I gave birth to a HIV-negative son who is my greatest testimony.

It is my perception that we were all sent here with a purpose and I am walking in mine. We can learn so much from both the success and mistakes of others, which is why I share mine with those who are willing to listen.

Since I was diagnosed with HIV in 2008, my experiences have proved to me that there is a severe need to educate. So here I am. People should know that I, nor my HIV negative son for that matter, do not pose a threat to anyone by: sharing the air we breathe, the toilet seat, or even from their drinking cups. The list could go on. I thought we were past that, but obviously not. It's all love though. I'm here to help fill that gap of ignorance. It would be awesome to join a force that has already been killing this mission.

Why Ciarra wants to be part of A Girl Like Me: Writing for A Girl Like Me will allow me to share my voice through a certain tone of compassion, love and education with the mission of both raising awareness for HIV as well as eliminating HIV-related stigma. I want to be a voice for others who are not able to use their own.

The Well Project is a non-profit organization whose mission is to change the course of the HIV/AIDS pandemic through a unique and comprehensive focus on women and girls. Visit their website, www.thewellproject.org, to access fact sheets (English and Spanish), blogs, and advocacy tools, and to join a global community of women living with HIV.
