Upgrades to iStayHealthy

October 13, 2012 By iStayHealthy

There are 2 upgrades to iStayHealthy on their way:

For iPhone/iPad: I submitted version 3.2.1 to Apple on 7 Oct. This should address issues for users with iCloud and iOS 6 - and some other bug fixes and improvements.

For Android: just uploaded a new version 2.0.8 to Google Play. This version now includes Stribild in the medication list.
