

VLOG: Can You Get HIV From Sharing a Glass of Water?

October 11, 2012 By [Shawn Decker](#)

Our second vlog post! We wanted to tackle a basic misconception about how HIV is transmitted, one that has mysteriously persisted for over two decades now...

Gwenn and I are thrilled with the response to our vlog. Since Monday, the first post has gotten over 450 views. Much thanks to everyone who watched it and also those who shared it on Facebook and Twitter. Way beyond what we expected. And a great motivation moving forward as we make more of these in the hopes of opening up a discussion about sexual health while showing that those with HIV can- and do - have healthy relationships.

Hope everyone has a great weekend ahead.

Positively Yours,
Shawn
