

Biktarvy

Generic Name: bictegravir + tenofovir alafenamide + emtricitabine

Abbreviation: BIC + TAF + FTC

Drug Class: [Complete Regimens](#)

Company: Gilead Sciences

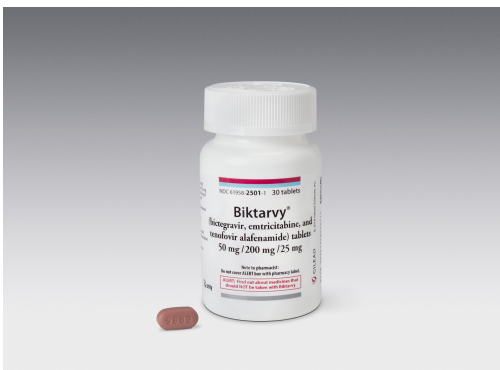

Approval Status: Approved

Generic Version Available: No

Drug Indication

The U.S. Department of Health and Human Services (DHHS) Antiretroviral Guidelines for Adults and Adolescents lists Biktarvy as a recommended initial regimen for most people with HIV and as a switch option for many individuals. Visit <https://clinicalinfo.hiv.gov/en/guidelines/hiv-clinical-guidelines-adult-and-adolescent-arv/> for the full DHHS guidelines for adults and adolescents.

General Info

Biktarvy is a single-tablet regimen for HIV. It contains an integrase inhibitor (bictegravir), a nucleotide reverse transcriptase inhibitor (tenofovir alafenamide, or TAF), and a nucleoside reverse transcriptase inhibitor (emtricitabine, or FTC). Biktarvy was approved by the U.S. Food and Drug Administration in February 2018.

Biktarvy may be used by people new to HIV treatment and those switching from another antiretroviral regimen with or without viral suppression if they have no known or suspected

resistance to the individual drugs in the combination pill.

Bictegravir is not expected to be available as a standalone drug for use in combination with antiretrovirals other than tenofovir alafenamide and emtricitabine.

Dosage

Adult Dose: One tablet once a day. Each tablet contains 50 mg bictegravir, 25 mg tenofovir alafenamide, and 200 mg emtricitabine.

Pediatric Dose: One tablet once a day for children weighing at least 25 kg (about 55 lb).

Dosing Info: This is a complete one-pill, once-daily drug regimen. It can be taken with or without food.

Side Effects

The most common side effects are diarrhea, nausea and headache.

Drug Interactions

For a review of drug interactions, including prescription and over-the-counter medications and supplements that should not be taken with Biktarvy or may require dose adjustments, consult the Biktarvy package insert.

Other Info

Before taking this medication, tell your doctor if you have kidney disease or liver disease (including hepatitis B). In addition, tell your doctor if you are pregnant or planning to become pregnant; if you are breast feeding, and all your medical conditions, including all prescription and over-the-counter medications and supplements you are taking.
